ABOUT US:

Polar Rubber Products Inc. can trace its roots to an organization that began in 1966 with a single green and yellow service truck. We have built our OTR Tire business on great service today – over 50 years later – we still strive to offer the highest quality OTR products with the best level of service. We have worked vigorously to expand the area we service weekly from Oshawa to include all of Eastern Canada and the United States. We also supply tires on demand to many global customers throughout the world.

PRP Tire officially incorporated our international division in 2004 with our customer service, sales, administration and logistics department all housed in the same complex as the retread and repair facilities. Our staff accounts for 100s of years in OTR Tire experience. Since then we have consistently grown while maintaining our focus on Service.

Continuous investment in our OTR Tire Retreading Plant has enabled PRP to utilize the best tools and materials required to supply your customers with consistent top quality OTR Tires. With three Marangoni computerized builders, three Marangoni computerized buffers, 10 autoclaves including a 180" ID, and over 30 Molds, we have the solution for all your tire needs. Our "state-of-the-art" equipment gives **PRP Tire** extensive output capabilities allowing us to exceed your expectations. It also allows us to rebuild and repair all sizes including 57 and 63 inch OTR Tires.

PRP Tire has a fleet of modern tractor trailers all equipped with cranes running Eastern Canada and the USA every week; combined with an on-staff Certified Customs Specialist (CSS) agent to coordinate all international shipping. We have the expertise to move anything anywhere – whether it is on our fleet, ocean container or through expedited LTL services – your OTR Tires will be there when you need them.

CERTIFIED USED:

PPR Tire is proud to offer **PPR Certified Used Tires**.

All tires are subjected to Polar's ridged 5 point process thus enabling Polar to offer the best used tires.

The PPR Certified Used Tire has a three tier grading system.

We use **Gold**, **Silver** and **Bronze** to rate the overall condition of the tire.

As all of our Tires are Polar Rubber Certified Used Tires the grade scale just gives you another reference as how to utilize the tires. Our 100,000 sq./ft. facility processes many thousands of tires annually and this experience sets **PPR Certified Used Tires** above all our competitors.

GOLD

High tread used tire; our Gold tires are slightly worn and have higher tread, smooth even tread wear and would be suitable in any wheel of any machine.

GOLD

SILVER

A good all-around tire; these tires have medium to high tread, may show a few more cosmetic marks and may have repairs limiting them to certain wheel positions on certain machines.

SILVER

BRONZE

These tires have low to medium tread, may show more cosmetic cuts and abrasions but will provide the optimal options for matching up existing tires on machines.

BRONZE

As stated above all tires **Gold**, **Silver** and **Bronze** are subject to the same ridged process allowing us to Guarantee every tire that we sell.

All these features make buying our **Used Tires** economic, environmental, risk free and a very easy choice as your preferred used tire supplier.

PPR Tire offers the highest quality used tires with our industry-leading "Certified Used Tire" grading system. And with our "Ready-to-go" used tires, PPR provides the "Best in Practice" for used OTR Tires – always ready when you need them!

REPAIR SERVICES

Certified high quality repair only services.

Our experienced technicians utilize the highest quality materials to repair any size OTR tire with industry leading specialization in Ultra class repairs.

Every repair only tire is inspected by no less than four different technicians during the process.

Attention to detail and commitment to quality ensure you receive the very best repair only service available.

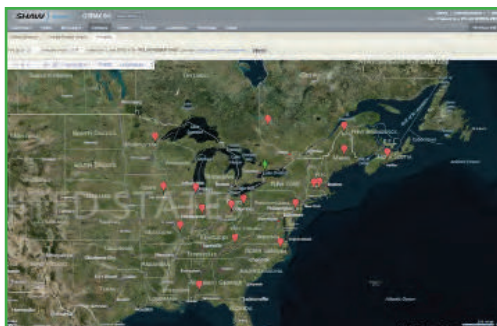

OUR FLEET:

PRP Tire has a fleet of modern tractor trailers all equipped with cranes running Eastern Canada and the USA every week; combined with an on-staff Certified Customs Specialist (CCS) agent to coordinate all international shipping.

We have the expertise to move anything anywhere – whether it is on our fleet, ocean container or through expedited LTL services – your OTR Tires will be there when you need them.

PRP Tire's fleet is equipped with state of the art GPS tracking system which allows a better efficiency of deliveries and pick-ups. It also helps us give you a better understanding of when you can expect our trucks in your yard. Qtracs is a live tracking system that shows us the exact locations of each truck at all times.

WARRANTY:

OTR Retread and Casing Warranty Policies

Polar Rubber Products warrants all our retreads, whether on a customer's casing or Polar Rubber Products casing, to be free from defects in materials, workmanship and casing failure to 15% of the original tread remaining.

Prorated credit will be given based on the actual invoice price¹.

Credit will be calculated based on the following formula:

- *Remaining Tread - 15% of original tread*
- *Original Tread - 15% of original tread x (Original Invoice Price)*

The customer pays the charges for the labour, freight, duty and any other service charges or applicable taxes.

¹ Actual invoice price refers to the price paid for products purchased from **PRP Tire**.

When both retread and casing are purchased and there is a defect in the retread or casing, the customer will receive **prorated credit for the price of the retread and casing**.

When a retread is purchased for a customer owned casing and there is a defect in the retread or casing, the customer will receive **prorated credit for the price of the retread**.

This warranty does not cover damage from road hazards, improper inflation, wheel misalignment, repair by another dealer, incorrect/improper mounting, vehicle damage, damage caused by abuse and neglect, collision, fire, impacts, vandalism, and chemical corrosion.
